

## Sunstrip Active DMX

### Incl. lamps & Powercon-lead

The Sunstrip Active is the successor of the already popular Sunstrip I and II. However, this Sunstrip is fully active and has a built-in dimmerpack. In order to make the unit most versatile for many applications you can select different DMX modes: 1 channel, 2 channel, 5 channel and 10 channel. For stand-alone applications, the Sunstrip Active is equipped with 16 built in patterns as well as a manual dimmer. With its Neutrik Powercon in- and outputs the Sunstrip is suitable for the most demanding users on the road. For easy mounting the Sunstrip Active is equipped with two Wall/Floor brackets as well as several M10 nuts, in order to put your clamp in any desired position.

### Technical Info
